German Expertise in
Technical Documentation and
Content Delivery

DOCUFY Suite

EXCELLENT INFORMATION. EVERYWHERE

DOCUFY[®]
COSIMA

„The XML-Component
Content Management
System.“

DOCUFY[®]
EXCELLENT INFORMATION. EVERYWHERE

More than 15 years several German and European automotive OEMs are producing their manuals for cars, light trucks, trucks and busses with the expert system Cosima by DOCUFY

COSIMA – The Content Management System for Technical Documentation

- Publish documentation digitally in a highly automated, cost-effective and legally compliant manner
- With COSIMA, rely on a proven, highly flexible standard product that can be expanded at any time and has a large customer base in mechanical and plant engineering, automotive, health-care, and software
- Document many product variants in many languages with little personnel effort
- Digitally integrate documentation department end-to-end in complex business processes and IT environments
- Use information from COSIMA seamlessly and fully automatically in TopicPilot's mobile applications

DOCIFY[™]
COSIMA

Feature Highlights

Cosima – headless CMS

Topic-based
writing

Arbitrary
XML schema

Product variants
(PI classification)

Review and
approval workflow

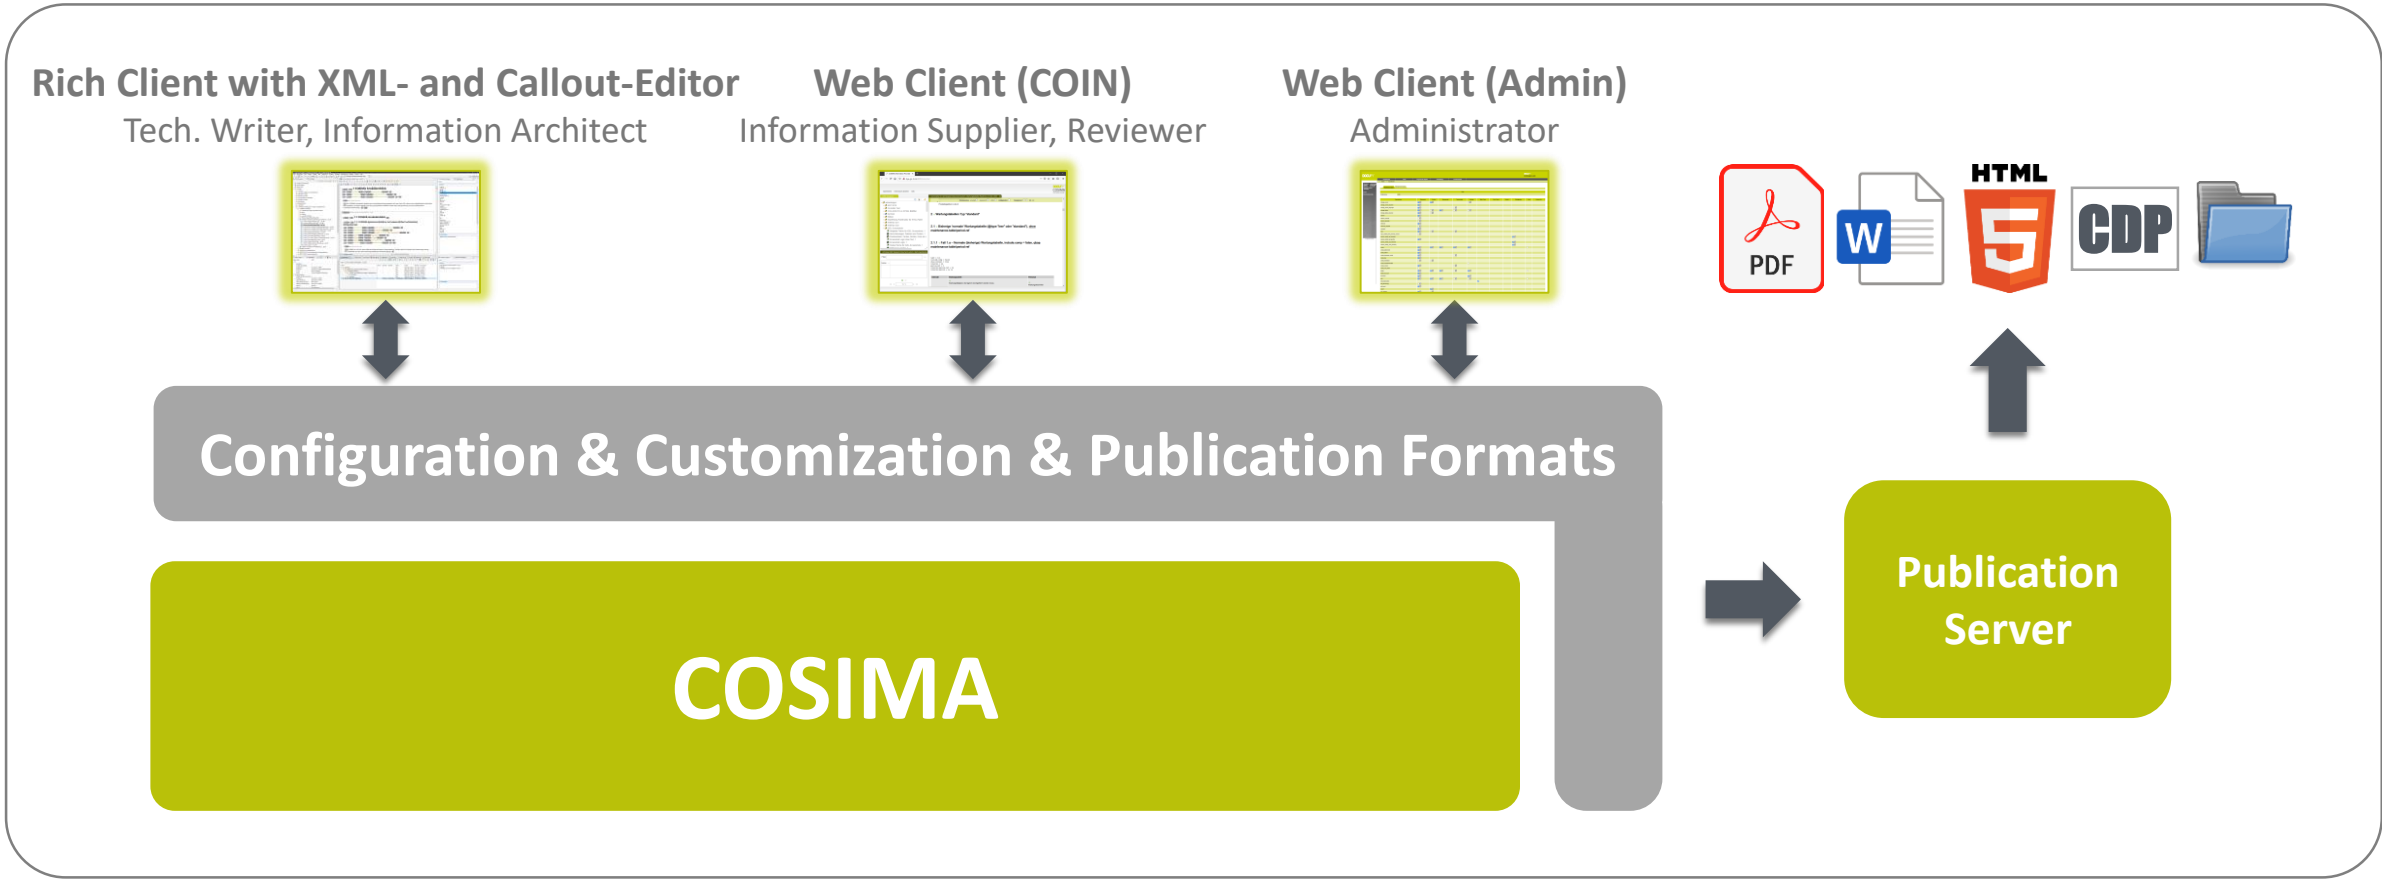

Audit-proof
versioning

Translation
management

Integrated
call-out editor

Fully automated
media production

COSIMA = Mature and practice-proven feature set + Extremely flexible configuration + Unlimited adaptability

Work offline

- Internet is not always and everywhere available
- For scenarios in which information needs to be displayed, filtered, but also kept up to date even without permanent Internet access, TopicPilot offers you an offline mode in the mobile applications.

Digital manual on-board of the machine

- The Smart Factory becomes reality: Man, machine, automation and software work together perfectly in the production environment
- Use machine control and instructions in one fully integrated user interface
- Depending on the machine status, operator automatically sees the appropriate instructions
- Integrate interactive diagrams (such as circuit diagram) and instructions
- No paperwork
